My career

Current labels

WHAT I CALL MYSELF

A [high-flier]

**Has a desire to and is expected to:** Make it in one's chosen career

A [knowledge worker] / [gold-collar worker]

Has a role that involves: Using knowledge to solve complex and non-routine problems.

A [software engineering student]

Actively develops skills that: Are needed to produce software across all of it's phases

After a number of these *"sprints"*, there will also be a launch and then a maintenance phase

A [machine learning engineering student]

Actively develops skills that: Are needed to make computers learn from data without being explicitly programmed

Skills I'm developing:
- How to make computers detect, track, recognize, classify, and analyze objects. I'm primarily interested in computer vision
- How to solve ML problems

A [technical director]

Has a role that involves: Making technical decisions that align with business goals. Providing guidance to others

A [social entrepreneur]

Has a role that involves: Trying to run a profitable business and benefit society in general through this venture

Desired additional labels

WHAT I WANT TO BECOME
